

## PUTTING YOUR ANIMATION TOGETHER (CHEAT SHEET)

### iMovie:

#### (1) "File → New Project"

ASPECT RATIO: STANDARD (4:3)  
"CREATE"

This project is EMBEDDED in iMovie and will ALWAYS SAVE. HOWEVER - other people's projects are saved here, too. Any evidence of project tampering will receive an "F" on this assignment and no more computer time in class.

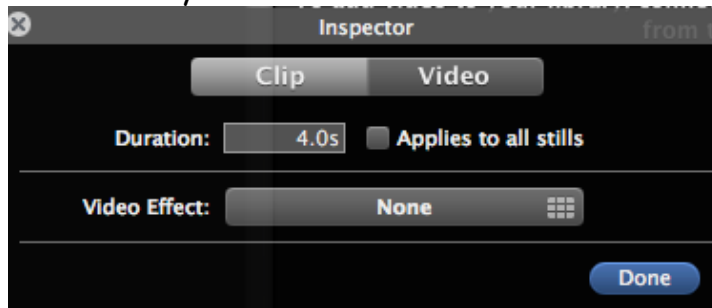

#### (2) Drag and Drop IMAGES and SOUNDS to the timeline (ignore the 'event library' for this project)

#### (3) Set TIME for pictures

"SELECT ALL" (command "A") clips in your timeline

Double click to pull up the INSPECTOR to set your time for ALL clips to (.2s) or adjust as necessary.

OR... just double click ONE clip at a time for special settings.

#### (4) Remove KEN BURNS if necessary

"SELECT ALL" (command "A") clips in your timeline

Click on the "Crop" tool and select "Fit"

#### (5) EXPORT iMOVIE as an .mov (Quicktime):

SHARE → EXPORT MOVIE → (medium)

Save this .m4v into the FINISHED ANIMATION folder.

# Garage Band:

(1) "Create New Project"

(2) Add Tracks

Track → New Basic Track

(3) Drag music clips to multiple timelines.

(4) EXPORT as .mp3 (SAVE IN ANIMATION FOLDER)

Share → Export song to Disk → mp3 encoder (pull down) → EXPORT
